

Analyzing Chinese Financial Practices In Africa

Project Title	Analyzing Chinese Financial Practices In Africa
Project Summary	Analyze the impact of Chinese financial practices on African economies
Country	Germany
Country/Region of Focus	Africa

Project Description

China is expanding its presence in the financial sector throughout Africa both through both loans to governments and, increasingly, commercial banks. Provide an analysis of Chinese banking and financial infrastructure in Africa detailing how transactions are handled (on what systems, in what format, and by what means of transmission). Provide detailed analysis, mapping key nodes and linkages to the worldwide payment systems. Determine whether the Chinese are compliant or divergent from current accepted international norms for loans and other financial management practices. Provide an analysis on potential impacts to affected African nations and the world banking systems.
